1. Free Bench Plan

Want to enhance the entire look of your garden or yard? Also willing to add some unique and creative element to it? Then, building a mini wooden well might fit your needs perfectly.

In the first woodworking plan, we are going to guide you about wishing well planter project. You can get the job done easily with basic woodworking skills, as its building process doesn't need any extensive expertise in working with lumber.

Free Bench Plan

This free project explains everything you need to build not only an outdoor bench but also a small side table. That will look incredibly adorable in your yard. Although, the tables are pretty self-evident and as I had no need for them at the moment so I did not include them in the video tutorial.

This project doesn't need any long list of materials and tools. You only require some screws, 2x4s boards and some other standard woodworking supplies like a saw and glue.

Source: <http://jayscustomcreations.com/2013/06/free-plans-2x4-outdoor-bench/>

On one hand, I suggest you buy some quality materials, as the Bench will look good and will be very durable, in the long run. Check the boards and materials before buying, if that are in a good condition, otherwise you won't be able to get a nice result.

2) Build an Adirondack Chair

This Adirondack chair project will help you to build an outdoor chair that may become the centerpiece of your backyard.

Build an Adirondack Chair

There's a great thing that so many plastic patio chairs are manufactured to stack, and the aluminum ones can be folded up flat. This means we can get them put away and store them out of sight as momentarily as possible. However, if you think outdoor furniture can enhance your garden and yard, consider building a set of Adirondack chairs that can evolve on the lobby of summer homes and alternates of upstate New York. This is an object that no one will want to hide in their house because it simply looks so pretty. In this version of Adirondack chairs, you can add a matching table so you will have a stylish surface for a good book and cool drinks.

Source: <http://www.popularwoodworking.com/adirondack-chair-plans>

Although, there are a few angles and curves to cut in the project but there is no fancy joinery in it -- everything's held together with the deck screws that are corrosion-resistant. If you are building more than one chair, it needs to make templates for its parts like the arms, back rails and side rails. The YouTube video tutorial of the project is also available here in brief. If you are confused about this one, you can also search for some more wooden Adirondack chair project ideas. In the link below you can find some really interesting wooden Adirondack chair ideas.

3) DIY Porch Swing

Having swing in your own home, yard or garden can be so de-stressing and be relaxing a thing to enjoy, that doesn't matter you have a big yard or patio, or vacant porch. Kids will surely fall in love with this swing porch and love playing on a breezy day. Even, adults also do relax and enjoy a quite morning coffee, or just being embraced by the sun in the swing.

DIY Porch Swing

This may seem like a long project, but in fact, this is pretty simple and doable DIY plan even for a beginner.

Source: <https://www.builddirect.com/blog/7-plans-for-swings-and-gliders-for-the-porch-and-yard/>

Building a porch swing is an impartially simple woodworking DIY plan that is perfect for the beginner or intermediate woodworkers. All the porch swing projects have blueprints and detailed instructions to help you succeed. But, don't limit yourself if you don't have a front porch for a swing. Think about your back porch, deck, or even a tree in your home, yard or garden. You can even exclude one of them from an arbor or swing set frame. Try some more Porch swing ideas for an interesting weekend.

Source: <http://perfectporchswing.com/11-great-wooden-porch-swings-online/>

I have also included a video tutorial so that you can get help step by step from it. The video tutorial includes a complete guide to building Porch swing. You can also search for some more designs and ideas of building Porch swing for your yard or patio.

4) Folding Picnic table

This is simply a clever design. The 2-in-1 combo can be switched easily between a garden bench and a picnic table. If you are having a picnic plan outside, this piece of furniture can be your picnic table. And when you just want to sit and relax in your yard or garden, you can fold down it to a garden bench.

Folding Picnic table

Two good looking garden benches combine to form a picnic table, that's a perfect idea for summer dining. You can build this outdoor furniture by using basic tools, materials, and supplies available at any home center. You won't believe your eyes at this plan for a unique picnic table that can convert from two separate garden bench seats into an awesome picnic table.

Source: <http://www.instructables.com/id/picnic-table-and-bench/>

The engineering involved in building this garden bench is pretty simple, and we have provided some links to get a full cut list and plans with photos to help you along the way. Additionally, to the stock lumber, you will need wood screws, barrel locks, and hinges to complete the table. A miter saw or hand saw is also extremely helpful for cutting down your stock to the correct angle and length. Beyond the normal guidelines, instructions, and diagrams, you can also watch a video linked above, to see how to build this folding picnic table. If you are not comfortable with the idea then searching on the internet can help you to find some more ideas of folding picnic table.

5) Toy Box Plan

Want to make your child Happy? Build a free toy box as a gift for them that they will cherish for years. That's a great way to add some storage to a playroom or kid's room and the kids will obviously love being able to organize all their toys.

Toy Box Plan

Some of the plans make it super easy to build a toy box or chest, but some of them may be more difficult if you are a beginner woodworker.

Check the link that has an awesome designed toy chest. You can try this one for your kids. Be sure to look through each plan to see which one will work best for your skill level and the child's needs. The source link also includes more pictures that can help you to build a better Toybox.

Source: <http://www.ana-white.com/2014/07/simple-toy-box>

The best thing about the toy chest is that it is very easy to build. All you need is the basic understanding of woodworking and a few tools to get started. You can also modify your kid's toy chest in any way you want or build in a different design or color different from the one pictured above. You can try some other designs for your plan in the below-mentioned link.

Source: <http://www.woodworkingcorner.com/box.php>

You only need some basic tools to build this project that is miter saw, measuring tape, glue and some screws etc. I have included here the video tutorial that I followed in order to build myself a pallet wide rack.

6) Build Barn Doors

If you have a barn or a shed, a well-built set of Dutch-styled barn doors can provide you not only unique style and functionality but are very durable and quite attractive. These doors are traditionally sheathed with tongue-and-groove stock, but this set of projects also takes a little bit of a different approach.

Build Barn Doors

Barn doors are fun decorating trend nowadays that go beyond the farmhouse! Whether your styles are contemporary, industrial, cottage, or French country, there is a barn door style for you. Building a Barn door is an easy task for every woodworker, even for a beginner or intermediate builder. When you are gathering inspiration for barn door Plan, be sure to note the cost of the tools used in the plan. Barn door tools can often cost more than your actual door! But, there are many clever and affordable do it yourself tools options in the tutorials mentioned below! Let us explore some DIY Barn Door Tutorials. Just click on the blue text below and check some amazing fun Barn doors. They might be different from the one shown in above picture.

Source: <https://www.pinterest.com/pin/40250990398408076/>

Luckily, we have also managed to find a detailed video tutorial of the Barn door project that illustrates the process of building a Barn door of your own. The steps and instructions in the video tutorial are different from the source links listed above. Actually, you can make different types of designs for your Barn door depending on which one you can afford easily and DIY on your own.

7) DIY Wooden iPad Dock

We are living in a time where we can't do anything without having our smart assistants with us. Yes, I am indeed talking about our Smartphones, those small devices we depend on so much.

DIY Wooden iPad Dock

A super simple iPad Dock/stand made out of a single block of wood features an angled groove which gets to support the tablet device and a cut in a hole to revise access to the home button of your iPad. It's possible to drill an access channel in the stand through which you can run a charging cable, although this mini stripped back iPad stand may have very limited functions. After the testing of three days, we are able to confirm, that the wood doesn't scratch your iPad, neither your iPad fall over when you tap the screen you can use it horizontally while charging 😊

Source tutorial: <http://www.instructables.com/id/DIY-wooden-5-iPad-Dock-Stand/>

Some tools required for this project are a hand saw or miter saw, measuring tape, Drill and sand paper etc. The source tutorial will explain you everything properly and briefly.

The In case you are confused about this one, you can also find some more amazing designs for your iPad stand / Dock from the link given below.

Source: <https://www.pinterest.com/explore/wooden-ipad-stand/>

We are also including the step by step processed video tutorial to make it easy for you. It might be a quite different tutorial but the video will let you know some illustrates of how to do it yourself.
